FUN WITH FRINGE

Consider fringe one of the latest, coolest embellishments in home furnishings that can transform a design instantly by dressing it up or down.

"Fringe is wonderful because it's both classic and incredibly current," said interior designer Lisa Kahn. "It works well with the carefree, bohemian styles that have been popular in both women's clothing and decor. It is a perfect addition to a layered look that evokes a sense of fun and daring, elegance with a sassy side."

"It's flirty and edgy," added Landyn Hutchison of Living with Landyn. "I mean, who doesn't want a little of that in their life?"

A fringed skirt gives this blue velvet pouf from **Bloomingville** extra pizzazz.
